

PROFESSIONAL SUMMARY

2 years of experience driving **business growth**, profitability, and **data-driven decision making** across high-scale e-commerce, dropshipping and logistics ecosystems. Owned initiatives end-to-end, spanning **0→1 product builds** through multi-crore **P&L management**, and translated complex business problems into scalable SQL / Python analytics and automation.

EDUCATION

Degree / Certificate	Institute / Board	CGPA / %	Year
Dual Degree (B.Tech + M.Tech), ISE	IIT Kharagpur	7.53	2024
Senior Secondary	RBSE Board	84.2%	2018

EXPERIENCE

- **CityMall**

Sept'24 – Present

Data Analyst, Full Time

Gurugram, India

– Spearheaded the 0→10 build of a dropshipping and self-shipping aggregation platform, where I designed scalable P&L **measurement frameworks**, AI-driven margin intelligence, and profitability levers that grew CM2 from **0%→15%** in 12 months across **Rs. 70 Cr** revenue and **Rs. 300 Cr** FY26 NMV

– Launched and scaled a seller **Payout & Financing** product across 100+ dropshippers and D2C brands handling **Rs. 7 Cr+** monthly transaction flow, offering D+X settlements, flexible payout cycles and risk-hedged holds, which delivered **+2.7%** incremental revenue, **60%** faster processing and stronger seller liquidity

– Built scalable SQL / Python **analytics and performance-tracking frameworks** on **700K+ monthly orders**, covering automated reporting, top-line success metrics and live operational monitoring, which improved cross-functional visibility by **30%**

– Led weekly **Root-Cause Analyses** on CM2, RTO and margin anomalies across **7+ logistics vendors**, disentangling confounding drivers (pricing, catalog quality, partner SLAs) to drive corrective plans with cross-functional teams and reduce operational leakage by **25%**

– Engineered a scalable **fraud-detection framework** on 6+ behavioural and transactional signals across 700K+ monthly transactions, which flags **20K+** high-risk cases per month at **21%** precision, protecting platform integrity and cutting fraudulent activity by **25%**

– Owned SKU-level pricing, weight calibration and logistics cost-attribution models for **1K+ products** using **experiment design and iterative A/B testing**, reducing cost leakage by **12%** and lifting delivery success by **20%**

– Delivered weekly executive briefings to **C-suite** and cross-functional teams, translating complex SQL / Python analyses into strategic narratives that directly influenced **3 major policy decisions** on pricing and risk management, driving **12%** cost reduction and **19%** margin improvement
- **Heltar Pvt Ltd**

May'23 – Jul'23

Data Analyst Intern

Delhi, India

– Built real-time **Tableau** dashboards on core business metrics, informing strategy and lifting operational efficiency by **20%**

– Trained **sales-forecasting ML models** to **95%** accuracy, powering marketing's targeting for campaign planning

– Wrangled **2 TB** of raw data into modelled tables, streamlining team analytics workflows by **30%**

– Presented insights to leadership; recommendations adopted, driving a **15%** CSAT lift

– Automated weekly reporting in **Python** and **SQL**, cutting manual effort by **40%** and improving data reliability

SKILLS

- **Programming & Querying:** Python, SQL (advanced, incl. window functions and CTEs), R, Bash

• **Databases & Warehouses:** MySQL, PostgreSQL, ClickHouse, Amazon Redshift, Amazon Athena, BigQuery, Snowflake

• **Python Data Stack:** pandas, NumPy, SciPy, scikit-learn, Statsmodels, Matplotlib, Seaborn, Plotly, Jupyter

• **BI, Cloud & Data Engineering:** Tableau, Power BI, Looker, Excel (advanced, incl. Power Query and Pivot), Google Sheets, AWS (S3, Athena, Redshift), GCP (BigQuery), Airflow, dbt, Git, ETL / ELT pipelines

• **Statistics & Machine Learning:** Hypothesis testing, A/B testing, Causal inference, Regression, Classification, Clustering, Random Forest, XGBoost, Time-series forecasting, Feature engineering, Cross-validation

• **Business Analytics & Domain:** Product analytics, Dashboarding, P&L modeling, Root-Cause Analysis, Cohort / funnel / retention analysis, LTV & CAC modeling, Risk & Fraud analytics, E-commerce, Dropshipping, 3PL logistics, Fintech, Marketplace operations

ACHIEVEMENTS & CERTIFICATIONS

- **Selected**,for **Amazon ML Summer School** - cohort of top ML students across India

[Certificate]

Aug'22
